REQUEST FOR RESEARCH BY UNIVERSITY OF CALIFORNIA
ON INJURIOUS MATERIAL USED IN PEST CONTROL

Supervisor McDermott moved the adoption of the following resolution:

WHEREAS, the agricultural industry of California, which last year had a total income well in excess of two and one-half billion dollars, vitally depends on control of injurious insects, plant diseases and weed pests through application from aircraft and ground rigs of various insecticides, herbicides and other pesticides, and,

WHEREAS, the application of said insecticides, herbicides and other pesticides presents

a hazard, by reason of their damaging qualities, to susceptible crops through the drifting of said materials by the wind, and

WHEREAS, County Agricultural Commissioners are the chief local enforcing agents of rules and regulations governing the methods, times, equipment and necessary precautions relating to such agricultural pest control operations, and

WHEREAS, County Agricultural commissioners are handicapped in performance of their official duties by the scarcity of dependable data on volatility, swath width, droplet size, temperature, wind velocity, gallons per acre, nozzle spacing, pressure, height above ground, and nozzle aperture as specified in rules and regulations pertaining to injurious materials, injurious herbicides, and the agricultural pest control business, as these factors affect the magnitude and significance of drift of sprays and dusts during application and after application.

NOW, THEREFORE, BE IT RESOLVED that the Yolo County Board of Supervisors respectfully requests the Honorable Regents of the University of California, as the policy making body for the College of Agriculture and Experiment Station, to request those agencies to promptly institute appropriate research, experiments and study as may be required to determine how agricultural pest control operators and farmers may eliminate or effectively reduce the drift of injurious materials used in pest control.

MAY 3 1954

THIS AGREEMENT, made and entered into this 22nd day of March, 1954, by and between SOUTHERN PACIFIC RAILROAD COMPANY, a corporation of the States of California, Arizona and New Mexico, and SOUTHERN PACIFIC COMPANY, a corporation of the State of Delaware (successor in interest as of September 30, 1947, to Southern Pacific Company, a Kentucky corporation), first parties (hereinafter collectively referred to as "Railroad"), the STATE OF CALIFORNIA, acting by and through its Department of Public Works, second party (hereinafter referred to as "State"), and the COUNTIES OF SACRAMENTO and YOLO, acting by and through their respective Boards of Supervisors, third parties (hereinafter collectively referred to as "Counties"); WITNESSETH:

WHEREAS, on or about September 6, 1910, Railroad (the term "Railroad" as herein used shall be deemed to designate Southern Pacific Railroad Company and Southern Pacific Company, a Kentucky corporation, for the period prior to September 30, 1947, and Southern Pacific Railroad Company and Southern Pacific Company, a Delaware corporation, for the period subsequent to September 30, 1947) entered into an agreement in writing with Counties, by the terms of which Railroad agreed to construct and operate a combined railroad and highway drawbridge across the Sacramento River between a point near the end of "I" Street in the City of Sacramento, Sacramento County, California, and a point in the Town of Broderick, Yolo County, California; and

WHEREAS, pursuant to said agreement Railroad constructed said bridge, which is commonly known and described as the "I" Street Bridge, as a combined railroad and highway swing drawbridge, with a lower deck for railroad traffic and an upper deck and approaches thereto for highway traffic; and

WHEREAS, said agreement provided, among other matters, that Railroad would grant to Counties the right, easement and privilege of using said upper deck and the approaches thereto for highway purposes, and would keep in repair, police and operate said bridge, including said upper deck and approaches thereto; said right, easement and privilege of Counties and said duty of Railroad to repair, police and operate to continue in effect for a period as long as the life of the bridge for railroad purposes; and

WHEREAS, said agreement further provided that, in consideration of the undertakings on the part of Railroad, Counties would make certain yearly payments to Railroad over a period of seven (7) years, designated in the agreement as rent, for the use of the upper deck and approaches thereto during said period, and thereafter make yearly payments of Fifteen Hundred Dollars (\$1500) in the case of Sacramento County, and Five Hundred Dollars (\$500) in the case of Yolo County, commencing August 15, 1917, and continuing during the life of the bridge for railroad purposes, designated as being in consideration of Railroad's assumption of the obligation for the keeping in repair, operating and policing of said upper deck of said bridge and approaches thereto; and

WHEREAS, both Railroad and Counties have performed their respective duties and obligations under said agreement, which is still in full force and effect; and

WHEREAS, on or about June 1, 1936, Railroad, State and the City of Sacramento (hereinafter referred to as "City") entered into an agreement in writing whereunder, among other matters, Railroad granted to City the right to construct, maintain and use a highway, by means of concrete and steel viaducts and approaches, over and across certain parcels of land more particularly therein described, under the provisions of which agreement the existing approach to the upper deck of said bridge in the City of Sacramento on the east side of the river was removed, and a new approach thereto, together with a connection to said approach at Jibboom Street, was installed; and

WHEREAS, Railroad owns, maintains and operates all of said bridge, including approaches thereto, except that State or City by reason of the construction of said new approach and the

MAY 3 1954

Jibboom Street connection thereto, owns, maintains and operates the approaches to said upper deck located in the City of Sacramento; and

WHEREAS, the upper deck of said bridge and the approaches thereto, except the Jibboom Street connection to the east approach, have become a part of State Route 50 and therefore necessarily a part of the State Highway System, and as such have passed into full possession and control of the Department of Public Works, hereinafter referred to as "the Department", pursuant to the provisions of Section 90 of the Streets and Highways Code of the State of California, and the Department has the statutory duty to improve and maintain the same under the provisions of Section 91 of said code; and

WHEREAS, by reason of said upper deck and approaches becoming part of the State Highway System, the parties hereto recognize that under present law the Department has succeeded to the rights and duties of Counties under said agreement of September 6, 1910, and will, subject to changes which may be effected by future legislative enactments, continue to have such rights and be subject to such duties for such period of time, not exceeding the life of said bridge for railroad purposes, as said upper deck and approaches thereto remain a part of the State Highway System; and

WHEREAS, the parties hereto recognize that in the interest of public safety the present manually-operated barrier gates on the upper deck of said bridge should be replaced by gates electrically operated by remote control, together with necessary signals and other devices, interlocked with bridge movements to properly control vehicular and pedestrian traffic, and agree that the cost thereof is not an obligation of Railroad under said agreement.

NOW, THEREFORE, in consideration of the premises, and of the conditions and agreements hereinafter contained, to be kept and performed by the parties hereto as hereinafter stated, IT IS AGREED AS FOLLOWS:

1. State will design and Railroad will construct and install electrically-operated gates with suitable traffic control devices to replace the present manually-operated gates on the upper deck of said bridge, except that modification of the existing traffic signal installation at the intersection of the Jibboom Street approach with the main roadway will be done by or under State control and at no expense to Railroad. State will assume the cost of designing said gates and traffic control devices and Railroad and State will share equally the cost of constructing and installing said gates and traffic control devices, except said signals at Jibboom Street intersection; it being understood that said construction and installation will be done by Railroad forces, and that Railroad will, upon completion, bill State and State will reimburse Railroad for one-half the cost of said construction and installation. It is understood and agreed that the term "cost" as used herein shall include all expenses of said construction and installation incurred and charged or allocated by Railroad in accordance with its regularly established practice under the Uniform System of Accounts for Steam Railroads prescribed by the Interstate Commerce Commission.

Railroad shall perform such maintenance and make such repairs to said gates and traffic control devices (except said signals at Jibboom Street intersection), including renewals of the mechanism thereof as may become necessary, and one-half (1/2) the cost and expense thereof, as well as one-half (1/2) the cost and expense incurred by Railroad for materials and labor used in connection with maintenance, repairs and renewals of said gates and traffic control devices caused by collision with any vehicle or vehicles with said gates or devices, shall be paid by State to Railroad on presentation of bills therefor.

2. During the life of this agreement State will contribute as its proper share of the cost of operating said bridge, not including the Jibboom Street connection to the east approach or protective signals therefor, but including the above-mentioned gates and traffic control devices, the sum of Two Thousand Dollars (\$2,000) per year. Railroad will bill State annually, and State will pay Railroad, State's share of the cost of operation of said

MAY 3 1954

bridge during the preceding yearly periods ending August 15th of each year, commencing with the period from August 15, 1953, to August 15, 1954.

3. During the life of this agreement State at its own expense will assume the duty now performed by Railroad of policing and keeping in repair the upper deck of said bridge and the highway approaches thereto, except the Jibboom Street connection to the east approach, which is not a part of State Route 50 but is a Sacramento city street policed and maintained by the City of Sacramento at its own expense. For the purpose of this agreement, it is understood that the portion of the bridge to be policed and maintained by State shall include the concrete floor slab, asphaltic material thereon, curbs, walls and railings of the upper deck and highway approaches, excepting the barrier gates thereon, and excepting the Jibboom Street connection to the east approach, and shall also include the piers, abutments, foundations and superstructures of the highway approaches, except the Jibboom Street connection to the east approach, but shall not include any portion of the piers, abutments, foundations or superstructure of the portion of the bridge supporting both highway and railroad traffic. Railroad will police and maintain all portions of the structure not specifically designated above as an obligation of State or City.

4. During the life of this agreement, the agreement between Railroad and Counties relating to said bridge, and all payments required to be made by said Counties thereunder, starting with the payment for the period from August 15, 1953, to August 15, 1954, shall be and are hereby suspended; it being understood, however, that said agreement shall not be cancelled, and that upon termination of this agreement in advance of the expiration of said agreement of September 6, 1910, by reason of the upper deck of and highway approaches to said bridge ceasing to be a part of the State Highway System, or for any other reason, said agreement of September 6, 1910, unless changed by agreement of Railroad and Counties, shall again become fully effective so far as the upper deck and approaches on the Yolo County side of the river are concerned, and shall again become effective with respect to the upper deck and approaches on the Sacramento County side except to the extent that the rights and obligations of the parties thereunder have since been modified by law or by the terms and provisions of the agreement dated June 1, 1936, between Railroad, State and the City of Sacramento, to which agreement reference has hereinabove been made.

5. The life of this agreement shall be for such period of time as the upper deck of and highway approaches to said bridge are a part of the State Highway System, but not beyond the life of said agreement of September 6, 1910; it being understood by the parties hereto that, pursuant to the present provisions of Sections 71 and 73 of the Streets and Highways Code, the California Highway Commission may alter or change the location of any State Highway and may relinquish to any county or city any portion of any State Highway within such county or city which has been superseded by relocation. In the event of termination of this agreement by reason of the removal of said bridge, or by reason of said upper deck and approaches ceasing to be a part of the State Highway System, it is understood and agreed that State's obligation to police and keep in repair said upper deck and approaches and pay a share of the operating expenses of said bridge, shall cease, in the event of removal, as of the date the bridge is closed to highway traffic by reason of removal operations, or in the event of relinquishment, as of the date of the adoption of the California Highway Commission's resolution of relinquishment of the superseded portion of State Route 50 which includes said bridge. In either of such events it is understood that State will pay its share of the operating expenses which have accrued up to and including the date of said closure or resolution of relinquishment; and in the event of relinquishment, unless Railroad and Counties agree otherwise, Counties' share of the expense of keeping in repair, policing and operating the bridge for the period of time from the date of said resolution to August 15th next following shall bear such relation to the annual payments to be made by Counties

under the agreement of September 6, 1910, as said period of time bears to one year.

"EXHIBIT A"

ASSURANCE

WHEREAS, channel clearing, snagging and removal of debris in the interest of flood control is authorized by Section 13 of the 1946 Flood Control Act, and

WHEREAS, said work is authorized to be accomplished under the supervision of the Chief of Engineers, Department of the Army, and,

WHEREAS, the laws of the United States require that local interests furnish satisfactory assurances that they will (a) provide without cost to the United States all lands, easements, and rights-of-way necessary for the accomplishment of the authorized work; (b) hold and save the United States free from damages due to the construction works; and (c) maintain and operate all the works after completion in a manner satisfactory to the Chief of Engineers, Department of the Army;

NOW THEREFORE, the Yolo County Storm Drain Maintenance District No. 1 acting by and through the Yolo County Board of Supervisors does hereby give assurance that it will (a) provide without cost to the United States all lands, easements and right-of-way necessary for the accomplishment of the authorized work; (b) hold and save the United States free from damages due to the construction works; and (c) maintain and operate, after completion, the works described below, in a manner satisfactory to the Chief of Engineers, Department of Army.

The works and obligations for which assurance is given are as follows:

Snagging and clearing work, by the Government, along the channels of Cottonwood Slough, and the South Fork of Willow Slough near Madison, Yolo County, California. This work includes the removal of trees, brush, snags and other debris which are restricting the runoff of flood waters in these sloughs at the locations described as follows:

Cottonwood Slough: From the Capay Canal, near the westerly boundary of Yolo County Storm Drain Maintenance District No. 1 downstream to its junction with the South Fork of Willow Slough, a distance of approximately 4 miles.

South Fork of Willow Slough: From State Highway No. 16 downstream to the easterly boundary of the Yolo County Storm Drain Maintenance District No. 1, a distance of approximately 8 miles.

It is understood and agreed that the total Government cost allowable for the above enumerated work is \$40,000, and that if said Yolo County Storm Drain Maintenance District No. 1 desires to further improve the channels referred to above, it will assume all excess cost by advancing funds to the Government or completing the work by direct expenditure for its own account.

It is further understood and agreed that the performance by the Government of the work referred to above is subject to and contingent upon the condition that said Yolo County Storm Drain Maintenance District No. 1 will perform at its own expense the following work:

Clear the channel of the South Fork of Willow Slough from the Capay Canal downstream to State Highway No. 16, a distance of approximately 2 miles.

Clear the channel of the Lamb Valley Slough from its junction with the South Fork of Willow Slough upstream to the western boundary of the District near the Capay Canal, a distance of approximately 1-3/4 miles.

Clear the Channel of the Madison Ditch from the town of Madison easterly to its junction with the South Fork of Willow Slough, a distance of approximately 3/4 mile.

Clear and excavate the channels under the State and County bridges located over the waterways in the areas referred to above.

Clearing of that portion of the channels of Cottonwood Slough within the boundaries of the Yolo County Storm Drain Maintenance District No. 1 not completed by the Government due to lack of funds.

The work to be performed by said Yolo County Storm Drain Maintenance District No. 1 shall meet the standards adopted by the Corps of Engineers for similar work and it shall be performed in accordance with the work undertaken by the Government under this assurance, and upon completion shall be maintained and operated in a manner satisfactory to the Chief of Engineers, Department of the Army.

SHIFT OF SCHOOL ELECTIONS TO
COUNTY CLERKS OPPOSED

Supervisor Rogers moved the adoption of the following resolution:

WHEREAS, legislation may be proposed in the State Legislature removing the responsibility for conducting school elections from the School Trustees and the County Superintendents of Schools and placing the responsibility in the hands of the County Clerks or Registrars of Voters, and

WHEREAS, only the larger counties of the State have such Registrars of Voters with separate election departments, while the greater number of the counties in the state are small counties and elections are handled by the County Clerks, and

WHEREAS, to shift the conducting of school elections to the County Clerks will bring about other districts desiring the County Clerk to take over the various district elections now conducted by said districts, and the shifting of this responsibility will create such an overload as to demand the creation of a separate election department and employment of additional workers in the offices of the County Clerks of the smaller counties and thus increase the tax load.

NOW, THEREFORE, BE IT RESOLVED that the Board of Supervisors of the County of Yolo does hereby oppose any such legislation for the purpose of shifting the responsibility of conducting school and district elections to the office of the County Clerk or Registrar of Voters, and

Repealed by
page 446 of
County Code Book

Supervisor Drew moved the adoption of the following Ordinance:

ORDINANCE NO. 276

(An Ordinance Regulating the Construction, Laying or Maintaining of pipes, drains or conduits across or along public roads, and the digging of any ditch or excavation therein or the making of any obstruction therein.)

The Board of Supervisors of the County of Yolo, State of California, do ordain as follows:

Section 1. It shall be unlawful for any person to lay, construct or maintain any pipes, drain, or conduit across, along or on any street, road or highway in the County of Yolo, or to make any excavation of cut or obstruction therein for such purposes without first obtaining a permit so to do in the manner herein provided. "Person" as used herein, includes any individual, firm, co-partnership, association, corporation, public district or other political subdivision. "Obstruction" as used herein shall not be deemed to include poles or pole lines, provided that no pole or pole lines shall be placed upon the improved portion of any highway.

Section 2. Any person desiring to construct, lay or maintain any pipe, drain or conduit across or along any street, road or highway in the County of Yolo, or make any excavation or cut, or obstruction therein for such purposes, shall make application to the County Engineer for a permit therefor. Every applicant shall state in detail the following information:

- (a) The location, dimension, purpose, extent and nature thereof.
- (b) The time during which it is estimated that such excavation or obstruction will exist.

- (c) Such other information as may be required by the Engineer.

Section 3. Every applicant for a permit hereunto shall file with the application a plat in duplicate showing the street or highway in which the proposed excavation will be made, together with the approximate locations and dimensions of the proposed excavations or obstructions. When excavations are made for service connections or for the location of trouble in conduits or other pipes, or for culverts or drainage pipes under driveways the Engineer may waive the filing of a plat.

Section 4. Immediately upon completion of the work necessitating the excavation or obstruction permitted by the permit issued hereunder the permittee shall at his own cost and expense, promptly and in a workmanlike manner refill the excavation or remove or relocate the obstruction. All excavations shall be refilled with such materials and in such manner as the County Engineer determines is most effective to accomplish a thorough consolidation and enable the highway to be restored to a condition equivalent to that in which it was prior to the excavation. Upon completion of the refilling of the excavation the Engineer shall require the permittee to resurface that portion of the street or highway damaged by the permittee's excavation or obstruction. Said resurfacing shall be done in accordance with such standards as may by resolution be prescribed by the Board of Supervisors of the County of Yolo.

Section 5. Except as hereinafter provided, the County Engineer shall require the applicant to deposit a sum of money sufficient in the opinion of the County Engineer to

cover the total cost of refilling any excavation and proper restoration of any highway as required hereunder. If the work of refilling the excavation is in accordance with the requirements of Section 4 of this ordinance and the restoration of the highway is completed in accordance with the standards herein prescribed, said deposit shall be returned to the permittee at the expiration of 180 days from the completion of the work. If during such time the refilled excavation settles, or if the resurfacing or restoration of the highway distintegrates or develops ruts or holes, the Engineer shall require the permittee to refill the excavation to the level of the highway and to repair or resurface the highway to eliminate all ruts and holes therein. If the permittee fails or refuses to do such work, the County Engineer shall do the work required, and pay the cost thereof out of the deposit. If the deposit is insufficient for this purpose, the deficiency shall be charged to the permittee. If the permittee fails or refuses to pay such deficiency upon demand, the County may recover the same by an action in any court of competent jurisdiction. Until the deficiency is paid in full no new permits shall be issued to such permittee.

Section 6. The County Engineer may waive a special deposit whenever in his opinion the proposed excavation or obstruction is of a minor nature.

Section 7. In lieu of making a special deposit required by Section 5 of this ordinance, the applicant may make and maintain with the Engineer a general deposit in an amount estimated by the Engineer to be sufficient to pay for the cost of any expected repairs occasioned by any excavation or obstruction authorized by any permit issued hereunder to said applicant, but not to exceed \$2,5000.00. The general deposit required shall be held and used for the same purposes as the special deposit required herein. Said deposit shall be a corporate surety bond, or other corporate bond acceptable to the County Engineer, cash, certified check or cashier's check payable to the County of Yolo. Provided, however, the maintenance of a general deposit shall not relieve an applicant from making application for every proposed excavation or obstruction, but more than one proposed excavation or obstruction may be included in one application.

Section 8. If the permittee fails or refuses to refill any excavation as required by Section 4 of this ordinance or remove any obstruction which he has placed upon the highway or fails and refuses to restore or resurface that portion of the surface of the highway damaged by him in accordance with the standards herein prescribed, the County Engineer may do such refilling and resurfacing and pay the cost thereof out of the deposit made by the permittee. Said deposit shall also be used to maintain said work for a period of 180 days after completion thereof. If the amount of the deposit is not sufficient to cover the cost of the work and the maintenance thereof the deficiency shall be charged to the permittee. If the permittee fails or refuses to pay such deficiency upon demand, the County may recover the same by an action in any court of competent jurisdiction. Until the deficiency is paid in full no new permits shall be issued to such permittee. In lieu of such deductions the County Engineer may bill such person for the amount owed by him to the County. If such amount is not paid within fifteen days of the rendition of said bill, the Engineer may deduct such amount from the general deposit as herein provided.

Section 9. No deposit shall be required of any public district or political subdivision which is authorized by law to establish or maintain works or facilities in, under or over any public highway, nor shall the application of any such governmental unit be denied except as hereinafter provided. Every such applicant shall be entitled as a matter of right to a permit but shall otherwise be subject to the provisions of this ordinance. The County Engineer shall have the right to deny a permit to such applicant where the applicant has failed to comply with the provisions of this ordinance relating to the refilling of excavations, removing or relocating obstructions or the resurfacing or restoration of any highway, and the maintenance thereon, under any previous permit.

Section 10. All permits issued hereunder shall be nontransferable and the work authorized by the permit must commence within thirty days of issuance thereof, and must be completed within the time estimated in the application. The County Engineer may grant a reasonable extension when the work has been unavoidably delayed without fault of the permittee.

Section 11. Nothing herein contained shall prohibit any person from making such excavation as may be necessary for the preservation of life or property when such necessity arises if the person making such excavation promptly notifies the County Engineer of any such action. Any person making such excavation shall refill the excavation in accordance with the standards prescribed by this ordinance that would be applicable if a permit was received.

Section 12. The issuance of a permit hereunder shall not be construed as imposing any liability upon the County of Yolo or upon any of its officers or employees by reason of damage or injury to persons or property resulting from any excavation or obstruction authorized by said permit.

Section 13. Except as provided in Section 11, every person who does or causes to be done any of the work herein mentioned without first obtaining a permit so to do shall be deemed guilty of a misdemeanor, and shall be punishable by imprisonment in the County Jail for a period not to exceed ninety days, or by a fine not to exceed \$250.00 or by both such fine and imprisonment.

Section 14. If any provision of this ordinance, or the application thereof to any person or circumstances is held invalid, the remainder of this ordinance, and the application of such provision to other persons or circumstances, shall not be affected thereby.

Section 15. All ordinances or parts of ordinances in conflict herewith are hereby repealed.

Section 16. Within fifteen (15) days after the passage of this ordinance it shall be published with the names of the members of the Board of Supervisors voting for and against the same at least once in the WOODLAND DAILY DEMOCRAT, a newspaper of general circulation printed and published in the County of Yolo.

STREET AND HIGHWAY LIGHTING

Applicability:

This schedule is applicable to service to street, highway and other public outdoor lighting installations, using incandescent filament or mercury vapor lamps with bracket, mast arm, or center suspension construction, and supplied from overhead lines, where the Company owns and maintains the entire equipment.

Territory:

The entire territory served outside of the incorporated limits, as they existed on the dates shown in the Index of Cities, of all cities and towns except the service area of former Coast Counties Gas and Electric Company.

Rate:

	Lamp Rating	Rate per lamp per month	
		All-Night Service	Midnight Service
Incandescent Lamps	600 lumens or less	\$1.90	\$1.60
	1,000 lumens	2.25	1.95
	2,500 lumens	3.45	3.00
	4,000 lumens	4.20	3.65
	6,000 lumens	4.95	4.15
	10,000 lumens	6.50	5.30
	15,000 lumens	8.35	6.65
	25,000 lumens	12.25	9.45
Mercury Vapor Lamps	11,000 lumens	7.60	6.40
	15,000 lumens	8.60	7.30
	20,000 lumens	9.20	7.70

Special Conditions:

- (a) Company reserves the right to supply either "series" or "multiple" service.
- (b) The above rates apply to lamps which will be turned on and off once each night in accordance with a regular burning schedule agreeable to the customer but not exceeding 4,100 hours per year for all-night service and 2,050 hours per year for midnight service.

(c) Rates for regular operating schedules other than full all-night but not midnight will be the midnight rates plus or minus, respectively, for each half hour per night more or less than midnight service, one-eleventh of the difference between the midnight and the all-night rate, computed to the nearest whole cent. This adjustment will apply only to lamps on regular operating schedules which do not exceed 4500 hours per year.

(d) The foregoing rates apply to installations of ten lamps or more. When service is supplied for less than ten lamps, the above rates increased by 10 percent will apply except in those cases where the customer supplies the switching service. Such increase in rates will be based upon the total number of lamps controlled from one switching point and not upon the total number of lamps billed to any one customer if controlled through more than one switching point.

(e) Where the Company has furnished an ornamental bracket and lighting unit for lamps of 4,000 lumens or larger and the average spacing between lamps on the same burning schedule exceeds 200 feet, as measured along the center line of the street, counting lamps on both sides, an extra charge of 30¢ per lamp per month is made. Ornamental brackets will not be furnished for new installations on this schedule after the effective date hereof.

(f) The above rates are applicable to street lighting equipment mounted on wood poles except when, at the customer's request, metal poles are installed for the support of street light equipment and conductors only. In such cases an additional monthly charge of \$2.00 shall be made for each such metal pole installed, unless the customer elects to pay the additional cost to the Company of providing and installing a metal pole. Concrete poles will be installed in Humboldt Division at the customer's request in lieu of metal poles. The additional monthly charge for such concrete poles will be \$1.25 per pole.

Special Conditions:

- (a) Company reserves the right to supply either "series" or "multiple" service.
- (b) The above rates apply to lamps which will be turned on and off once each night in accordance with a regular burning schedule agreeable to the customer but not exceeding 4,100 hours per year for all-night service and 2,050 hours per year for midnight service.
- (c) Rates for regular operating schedules other than full all-night but not midnight will be the midnight rates plus or minus, respectively, for each half hour per night more or less than midnight service, one-eleventh of the difference between the midnight and the all-night rate, computed to the nearest whole cent. This adjustment will apply only to lamps on regular operating schedules which do not exceed 4500 hours per year.
- (d) The foregoing rates apply to installations of ten lamps or more. When service is supplied for less than ten lamps, the above rates increased by 10 percent will apply except in those cases where the customer supplies the switching service. Such increase in rates will be based upon the total number of lamps controlled from one switching point and not upon the total number of lamps billed to any one customer if controlled through more than one switching point.
- (e) Where the Company has furnished an ornamental bracket and lighting unit for lamps of 4,000 lumens or larger and the average spacing between lamps on the same burning schedule exceeds 200 feet, as measured along the center line of the street, counting lamps on both sides, an extra charge of 30¢ per lamp per month is made. Ornamental brackets will not be furnished for new installations on this schedule after the effective date hereof.
- (f) The above rates are applicable to street lighting equipment mounted on wood poles except when, at the customer's request, metal poles are installed for the support of street light equipment and conductors only. In such cases an additional monthly charge of \$2.00 shall be made for each such metal pole installed, unless the customer elects to pay the additional cost to the Company of providing and installing a metal pole. Concrete poles will be installed in Humboldt Division at the customer's request in lieu of metal poles. The additional monthly charge for such concrete poles will be \$1.25 per pole.

JOINT RESOLUTION OF YOLO COUNTY GRANGES ON
WATER AND POWER DEVELOPMENT IN YOLO COUNTY

JOINT RESOLUTION OF YOLO COUNTY GRANGES
ON
WATER AND POWER DEVELOPMENT IN YOLO COUNTY.

A main objective of the Granges of Yolo county is the promotion of the development of

Mar. 16, 1956

MAR 16 1956

the water and power potentialities of the Cache Creek basin. This would mean irrigation, industrial and city water together with electric power for the benefit of all residing within the area, at the lowest possible cost.

Hydro-electric power and irrigation water are both cheaper when developed from the same system. This calls for the free enterprise of public ownership.

To accomplish these objectives we recommend the following action:--

1. Early conclusion of the water and power survey of the Cache Creek basin with the idea of developing electric power wherever feasible.
2. Formation of a water and power district to serve all residing within the Cache Creek basin.
3. Purchase of the properties of the Clear Lake Water Co.
4. To finance the immediate survey and development costs we recommend a County land tax or approximately two cents per acre, with industrial and city property based on assessed value.

ALL CITIZENS URGED TO COOPERATE WITH ATOMIC ENERGY
COMMISSION IN FORTHCOMING SURVIVAL SURVEY

Supervisor DuBois moved the adoption of the following resolution:

WHEREAS, the Atomic Energy Commission, in a recent announcement of great moment, has disclosed the fact that developments in thermonuclear weapons have completely altered previous Civil Defense concepts, so that now a large amount of the planning based on the Hiroshima bomb no longer is valid; and

WHEREAS, it has become plain that dispersal is the only practical answer to the survival problem of target-city populations; and

WHEREAS, dispersal of such persons -- either by planned movement before or by spontaneous exodus following enemy attack -- means that locally we may be called upon, beyond any present reckoning, to provide shelter, food and medical care for refugees; and

WHEREAS, the County of Yolo lies in the support area of San Francisco Bay Area; and
WHEREAS, findings by the Atomic Energy Commission indicate that, although we are in a support area and heretofore have considered ourselves relatively safe under present conditions, an attack on the San Francisco Bay Area could unleash against us a vast rain of deadly atomic radiation which would make it necessary for us to protect ourselves in heavily-insulated shelters or to flee from this area; and

WHEREAS, the California Office of Civil Defense is asking this community to participate in the statewide survival survey which starts March twenty-first, not only to assess our own resources to help others, but to show by our participation that we are counting on other communities to help us in case we ourselves may have to seek aid following an attack;

NOW, THEREFORE, BE IT RESOLVED that all citizens of Yolo County, State of California, be urged to cooperate in the forthcoming survival survey, in realization of the fact that our destiny here is bound to the destiny of all other Americans far more closely than ever before in the history of our country, whose very survival may in no small measure be held in the balance.

OPPOSITION TO WHOLESALE AND AUTOMATIC REDUCTIONS
IN ASSESSED VALUE OF PUBLIC UTILITIES
AND OTHER STATE ASSESSED PROPERTY

Supervisor Rogers moved the adoption of the following resolution:

WHEREAS, Chapter 1466 of the Statutes of 1949 threatens wholesale and automatic reductions in the assessed value of public utilities and other state assessed properties in the County of Yolo; and

WHEREAS, such reductions would, under provisions of the aforesaid chapter, shift the amount of these public utilities tax reductions to homeowners and other taxpaying groups; and

WHEREAS, the operation of this chapter could endanger the whole fiscal organization of this County and would strike a hard blow at the principles of equalized assessments and home rule in government; and

WHEREAS, the County Supervisors Association of California and the State Association of County Assessors, after long and careful study, continue to oppose this legislation; and

WHEREAS, this law, first enacted in 1949, has been suspended by the State Legislature from time to time, but unless repealed this year, will become operative on July 1, 1955.

NOW, THEREFORE, BE IT RESOLVED, that this Board of Supervisors hereby expresses its opposition to Chapter 1466 of the Statutes of 1949, and urges its appeal, and the substitution for it of proper statutory procedure providing for inter-county equalization of locally assessed property only; and

BE IT FURTHER RESOLVED, that copies of this resolution be sent to out representatives in the Legislature, to the Chairman of the Revenue and Taxation Committee of the Senate and of the Assembly, and to the Secretary of the Senate and the Chief Clerk of the Assembly.

COUNTY EMPLOYEES ASSOCIATION SALARY LETTER
ORDERED ENTERED IN THE BOARD MINUTES

After the Chairman read the County Employees Association Salary Letter of May 11, 1955, in the open meeting,

Supervisor DuBois moved that the Clerk enter the said letter in the minutes of the Board as follows:

COUNTY EMPLOYEES ASSOCIATION
P.O. BOX 179
May 11, 1955

Mr. J. W. McDermott, Chairman
Yolo County Board of Supervisors
Yolo County Court House
Woodland, California.

Dear Sir

A number of communications have been published and put on official record discouraging any pay increase of Yolo County Employees. Some of the remarks published distinguished themselves not as much by statement of true facts as by misinformation and sarcasm.

The Yolo County Employees Association presented to the Board of Supervisors, several months ago and without any fanfare or pressure, a more than moderate proposal which, without setting actual salaries for individual employees, would at least provide some uniformity and establish salary brackets; this system has long been recognized as valuable incentive to recruit and maintain in office competent and satisfied public servants.

In the meantime, the Employees Association has on purpose refrained from exerting any kind of pressure or propaganda in order to give the Board of Supervisors time to consider the matter in peace and quietude. However, in view of recent and largely uninformed publicity, we now respectfully request that this letter, likewise, receive recognition and be put on official record.
